

PRODUCT DESCRIPTION:

Each aliquot contains 1 µg of DNA extracted from a pure culture of a recombinant strain of *Saccharomyces cerevisiae*. A gene specific to *Cryptosporidium parvum* was inserted as a single copy into the genome of *S. cerevisiae* using standard recombinant techniques. *S. cerevisiae* was confirmed by rDNA sequencing. The insert was detected with a specific in-house real-time PCR assay. The purity of the culture was monitored by additional culturing and Gram staining to detect any contaminating bacteria. The DNA was extracted from the cells following a protocol based on the yeast protocol provided in the Qiagen® Genomic DNA Handbook and using Qiagen® Genomic DNA Buffers with a 500/G genomic tip. DNA concentration and A_{260/280} ratios were determined by testing a minimum of two aliquots on a NanoDrop®. The extracted DNA also tested positive on an in-house real time PCR assay.

INTENDED USE*:

Purified Genomic DNA is designed for use as an amplification and/or detection control for nucleic acid testing of *Cryptosporidium parvum*. It can also be used to determine a limit of detection (LOD), in diagnostic assay development, cross-reactivity studies or genomic sequencing. Controls should be run using the same protocols as those used to amplify extracted clinical specimens.

***This reagent contains a recombinant construct that may not represent the targeted genetic region for all possible assays analyzing for *Cryptosporidium parvum*. We have evidence of utility with assays designed by Luminex Molecular Diagnostics; however, the performance characteristics of this reagent should be determined by the end-user.**

PRECAUTIONS:

- Use Universal Precautions when handling Genomic DNA.
- The material may be re-frozen after thawing. Repetitive freezing and thawing is not recommended (aliquot material if necessary).
- To avoid cross-contamination, use separate pipette tips for all reagents.

RECOMMENDED STORAGE:

This control is supplied in TE Buffer and should be frozen at -20°C or below.

DO NOT USE IN HUMANS. FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES.
